(Lab Note) The reported concentration of the unknown peak in the standard L17-427-1 Cannabis Flawless laboratory can not perform an unidentified peak in your chromatogram due to interference (only with high concentration oil products) from which we believe to be either 100% THF or 90% THF. As this time there are no reference standards available for 100% THF. Only that is a different compound from the major cannabinoids and terpenes. While this information is provided for your information, it is not intended to be a substitute for your own laboratory. The identification of a peak that is not a cannabinoid or terpene is not intended to be a substitute for your own laboratory.
