Sample ID	SD220825-008 (51521)	Matrix	Flower (Inhalable Cannabis Good)

Analyses executed	CAN+		

LABORATORY NOTE: The estimated concentration of the unknown peak in the sample is 0.72%. Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference from high concentration of products from which we believe to be either (v)-THC or (d)-THC. At this time there are no reference standards available for (v)-THC, (v)-THC is a different compound from the most (d)-THC cannabinoid and therefore these two compounds may have different behavior. Using the most advanced instruments and techniques available, the attribution of (v)-THC and (d)-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (v)-THC and (d)-THC with the majority of the concentration being (v)-THC. Total cannabinoid is estimated to be 18.0%.
